## **DETAILED ACTION**

### ***Response to Arguments***

Applicant's arguments do not comply with 37 CFR 1.111(c) because they do not clearly point out the patentable novelty which he or she thinks the claims present in view of the state of the art disclosed by the references cited or the objections made. Further, they do not show how the amendments avoid such references or objections.

Based on the amendments to the claims, please see the new rejection as detailed below:

### ***Claim Rejections - 35 USC § 103***

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 13-17 and 19 (amended) and new claims 20-31 are rejected under 35 U.S.C. 103(a) as being unpatentable over Schiller et al US5035205.

Regarding claims 13, 20, 21, and 27, Schiller et al. disclose a disposable toilet box for cats comprising a rectangular box (figure 1) with a bottom and four vertical faces; wherein the back face 12 is longer than the side faces 22a, 22b such that the back face 12 is adapted to form the cover of the box (col 3, line 34); wherein the side faces 22a, 22b comprise an outcoming ply at the same height dividing the side faces in a upper part 22a, 22b and lower part 16a, 18a; characterized in that the top edge of the back face 12 has a shape 13 adapted for fixing the cover 12 when it is closed; oblique

Art Unit: 3643

plies are provided in the upper part of the side faces 22a, 22b respectively, starting from the meeting point of the respective horizontal ply with the back face of the box; and oblique plies 16b are provided in the upper part of the frontal face at the meeting point of the horizontal ply with the side face 16a, 18a.

Schiller et al. do not disclose the back of the box is formed of three curves; of which two are sharp curves at the corners and a lower plane curve in the middle to resemble the shape of a cat's head.

It would have been obvious to one having ordinary skill in the art at the time the invention was made to change the shape of the back face, since there is no invention in merely changing the shape or form of an article without changing its function except in a design patent. *Eskimo Pie Corp. v. Levous et al.*, 3 USPQ 23.

Regarding claim 14, Schiller et al. disclose that the bottom comprises four flaps 20b, 21a, 20a, 21b, the two larger flaps covering the whole bottom and the two smaller flaps foldable between the larger flaps covering together the bottom surface (col 3, lines 13-16).

Regarding claims 15, 17, 24, 26, 29, and 31 Schiller et al. disclose the box is made of carton (cardboard), which is biodegradable (col 3, line 7).

Regarding claims 16, 25, 30 Schiller et al. disclose the box is self-standing (see figure 4 and col 3, lines 49-52).

Regarding claim 19, Schiller et al. disclose the box can be filled with hygienic litter (col 1, lines 61-64).

Art Unit: 3643

Regarding claims 22, 23, and 28, Schiller et als disclose the oblique ply in 22a, 22b of the frontal face is adapted to receive the brow (unnumbered) thereby securing the back face in a closed position, and the frontal face is resistant against opposition of the cover (col 4, lines 4-10).
